

Manufacturer: Multivac
Type: C700
Year Built: 2006
Working Hours: 5374

The C 700 is the largest in our range of single chamber machines. It features the biggest chamber and the longest sealing bars. Three automation options are available with the C 700: automatic lid movement, automatic conveyor belt with height adjustment, automatic infeed and discharge conveyors with height adjustment

- Stainless steel construction
- Powerful pump
- Wide choice of sealing bar arrangements
- Microprocessor control
- Automatic progressive ventilation
- Vacuum "quick-stop"

- Chamber height 230 mm
- Filler plates for sealing height adjustment
- Modified Atmosphere Packaging system
- Filler plates for lid
- Roller conveyor belt
- Automatic height adjustment for conveyor belt, infeed conveyor & outfeed conveyor
- Various sealing bar lengths (960 mm front and 480 mm right or left; 1050 mm front, U-seal 960 mm front, 480 mm right and left)
- Double seam sever sealing at top (1 x 3 mm, 1 x 1 mm)
- Double-seam sealing at top (2 x 3 mm) with perforating blade
- Single seam sealing at top (1 x 6 mm)
- Single seam sealing at top & bottom (1 x 6 mm)
- Stainless steel tilted insert for liquid products
- Vacuum pumps: 300 m³/h (Rietschle)
- External glass pot separator with drain for liquid or very wet products
- On rollers
