Year Built: 2010

T090 Wiezoplast - H320 - 310.5 x 241.5 x 45/90
T101 Faerch - 2220-1G - 220 x 130 x 37

Ishida's QX-775

Flex tray sealer has been specifically designed for the fresh food industry with the latest and unique hygiene features including self-draining surfaces throughout.

Using a combination of a smart interfaces, the latest servo technology and clever mechanical design, the single lane system can be optimised to suit all product and tray types, trays and film materials.

High precision sealing tools offer high quality pack and product presentation and can be designed to handle all types of sealing and MAP processes, giving the user full flexibility with an ever changing market. Easy, operator-friendly tool changes using automated loading and motorised lifting trolley.

Key benefits include:

- High-speed, user-friendly operation
- Simple integration into any production line
- Compatibility with board, plastic and aluminium trays
- Optional fully-integrated checkweighing
- Rapid tool changeover
- Vacuum, gas & gas-flushing MAP options
- Inside cut technology for aesthetic appeal
- Shelf life extension
- Excellent return on investment
